

SPONSORING AND DELIVERING SUCCESSFUL PROJECTS

We help business CEOs, COOs, CIOs, senior executives and business owners develop competitive advantage through the identification and prioritization of strategies and initiatives which generate sustainable growth and profitability.

WHAT YOU CAN EXPECT FROM THE WORKSHOP

Along with your peers or a group of project executives, you will expand your general knowledge of project management while learning the fundamental skills to successfully sponsor and manage projects to completion. Whatever your role, this workshop will prepare you to sustain the momentum to plan for strategic initiatives, overcome obstacles, deliver successful projects and promote change in your organization.

SESSION OBJECTIVES

As a workshop participant you will benefit from your improved knowledge and ability to:

- Identify ways you can contribute to effective project planning
- Optimize your individual performance and your organizational impact
- Empower others to be accountable
- Implement and respect governance
- Lead and support organizational change and create an environment that inspires and sustains results-focused change
- Implement ethical negotiation and decision-making strategies across all levels of the organization
- Report on progress
- Achieve project goals to support corporate strategic objectives

TAKING YOUR SKILLS TO THE NEXT LEVEL

In the workshop you will focus on identifying and understanding how your strengths and weaknesses help or hinder a project to build a personal action plan designed to help you be a more effective project sponsor and change leader.

You will expand your knowledge, skills, and confidence as you learn how to navigate project politics, deal with issues and align project teams to deliver on objectives.

Leveraging past and current projects as case studies, participants will participate in several role playing scenarios in groups to replay situations and apply best practices to enhance communication, effectively negotiate and reach consensus on critical project decisions.

At the same time, you will be able to identify and address personal blind spots in a supportive environment, and create a more balanced approach that enables you to work more effectively with a diverse range of colleagues. This personal action plan will help you to implement what you have learned in the workshop and to continue developing your ability to sponsor and lead projects and initiatives.

ABOUT BUSINESSONE CORPORATION

BusinessOne is a strategy management consultancy, which helps organizations address the critical components of organizational transformation by assessing and implementing the foundation for strategy execution. It does this through advising and implementing state-of-the-art management systems to plan for, evaluate and implement innovative business and technology solutions to become an agile organization.

Your company's organizational performance is only as good as the enterprise strategy and execution behind it.

Are you ready to explore how you can increase your organization's ability to deliver successful change initiatives?
